

HIRSCH

Maintenance Plus

The new analytic tool for preventive maintenance of the HIRSCH preexpander!

HIRSCH Technology proudly presents the next level of operation for the future:

The next generation of HIRSCH preexpanders not only **guarantees the requested density tolerance, bead quality and throughput**, but HIRSCH reduces maintenance- and downtimes to a new level!

A new developed soft- and hardware, integrated in the preexpander makes it possible to identify automatically potential problems before they occur.

With the new HIRSCH Maintenance Plus technology **all temperatures, pressures and movements are precisely measured in real time**. This allows the operator to **detect problems and react before the machine fails**.

Our new innovative tool for preexpanders brings a number of additional benefits for you:

- **Time to plan maintenance or repair works before the preexpander causes expensive downtime**
- **Time to order the necessary spare parts in advance**
- **Easy and immediate problem identification and troubleshooting**
